I got the pack it says Quest for the lost Eternia Shards Part 1 is already in my steam library but when i go into the game its says i need to get it please fix this i payed 25 euros. not worth it. Finally the story continues! And it gets maybe even better - big, pretty and challenging maps of different and of course distant places in Eternia. A must have for every Dungeon Defenders fan! 9/10. Do you have such bad arachnophobia that you will pass out when you see spiders? If you do then I would not buy this DLC. The reason I tell a person who has arachnophobia to not buy it is because there are alot of annoying spiders that come after you and make you partially paralyzed which can get annoying after awhile. This DLC is the first in the Lost Etheria Shards Quest and is a very good one. Alot of the maps that come with this are set in woody areas with alot of trees which brings a cool effect to the spiders that come from those trees. The maps are well laid out and give a good challenge. This will give you more weapons to fight with which is nice if your trying to find the perfect weapon for your hero. This is a great addition to your Dungeon Defenders collection as it adds so much to what you already have. Don't be left in the dark with this game, get this DLC so when friends want to play with you, you can be prepared.. love all dlc
